July 14, 2011
Nuclear and Industrial Safety Agency

Regarding Evaluation of Report related to Injection of Nitrogen into the Primary Containment Vessel (PCV) Implemented of Unit 3 of Fukushima Dai-ichi Nuclear Power Station, the Tokyo Electric Power Co. Inc.

The Nuclear and Industrial Safety Agency (NISA) requested the Tokyo Electric Power Co. Inc. (TEPCO) to submit a report related to the injection of nitrogen into the Primary Containment Vessel (PCV) of Unit 3 of the Fukushima Dai-ichi Nuclear Power Station (as announced on July 9, 2011), and NISA received the report on July 11 (as announced on July 11, 2011). This is to inform the public that NISA determined the implementation of the emergency measures of Article 64 paragraph 1 of the Act on the Regulation of Nuclear Source Materials, Nuclear Fuel Materials and Reactors (Act No. 166 1957) are permissible.

Attachment: Regarding the injection of nitrogen into the Primary Containment Vessel of Unit 3 of Fukushima Dai-ichi Nuclear Power Station, Tokyo Electric Power Co. Inc.
