To the addressee (see attached list of addressees)

(Nomination)

Nuclear and Industrial Safety Agency
Hiroyuki Fukano
NISA-181d-11-2
NISA-191d-11-1
NISA-314d-11-1

On July 21, 2011, the Nuclear and Industrial Safety Agency (hereinafter referred to as “NISA”) decided the “Assessment Procedures and Implementation Plan Regarding the Comprehensive Assessments for the Safety of Existing Power Reactor Facilities Taking into Account the Accident at Fukushima Dai-ichi Nuclear Power Station, Tokyo Electric Power Co., Inc.”. As to the comprehensive assessments for the safety at nuclear fuel cycle facilities, it was stated in the document as “separate implementation (of assessments on nuclear fuel cycle facilities) will be considered”.

With regard to the safety at nuclear fuel cycle facilities at the time of the events beyond the design basis, NISA has recently decided the assessment procedures and implementation plan for the comprehensive assessment as described in the Appendix.

In light of the above, NISA requested your company to conduct the comprehensive assessment for the safety of nuclear fuel cycle facilities of your company based on the “Assessment Procedures and Implementation Plan Regarding the Comprehensive Assessments for the Safety of Nuclear Fuel Cycle Facilities” as described in the Appendix and report the results to NISA.
(Attached list of addressees)
Global Nuclear Fuel Japan Co., Ltd. President Mr. Hajime Umehara
Nuclear Fuel Industries, Ltd. President Mr. Zensuke Iwata
Japan Nuclear Fuel Limited President Mr. Yoshihiko Kawai
Mitsubishi Nuclear Fuel Co., Ltd. President Mr. Takashi Sudo
Recyclable-Fuel Storage Company President Mr. Makoto Kubo
Regarding Implementation of Comprehensive Assessments for the Safety of Nuclear Fuel Cycle Facilities Taking into Account the Accident at Fukushima Dai-ichi Nuclear Power Station, Tokyo Electric Power Co., Inc. (Direction)

On July 21, 2011, the Nuclear and Industrial Safety Agency (hereinafter referred to as “NISA”) decided the “Assessment Procedures and Implementation Plan Regarding the Comprehensive Assessments for the Safety of Existing Power Reactor Facilities Taking into Account the Accident at Fukushima Dai-ichi Nuclear Power Station, Tokyo Electric Power Co., Inc.”. As to the comprehensive assessments for the safety of nuclear fuel cycle facilities, it was stated in the document as “separate implementation (of assessments on nuclear fuel cycle facilities) will be considered”.

With regard to the safety at nuclear fuel cycle facilities at the time of the events beyond the design basis, NISA has recently decided the assessment procedures and implementation plan for the comprehensive assessment as described in the Appendix.

In light of the above, NISA requested your agency to conduct the comprehensive assessment for the safety of nuclear fuel cycle facilities of your agency based on the “Assessment Procedures and Implementation Plan Regarding the Comprehensive Assessments for the Safety of Nuclear Fuel Cycle Facilities” as described in the Appendix and report the results to NISA.
