June 25, 2011
Nuclear and Industrial Safety Agency

The Nuclear and Industrial Safety Agency (NISA) requested Tokyo Electric Power Co. Inc. (TEPCO) to submit a report related to the implementation of injecting nitrogen into the Primary Containment Vessel (PCV) at Unit 2 of Fukushima Dai-ichi Nuclear Power Station (NPS) (as press released on June 22, 2011). This is to inform the public that, yesterday (June 24, 2011), NISA received the report from TEPCO.

NISA is now verifying the content of the report submitted by TEPCO.

Attachment:
Regarding the receipt of the order to submit reports related to the injection of nitrogen to the reactor containment vessel of Unit 2 at Fukushima Daiichi Nuclear Power Station (TEPCO)
