This is to inform the public that today (on November 7), the Nuclear and Industrial Safety Agency (NISA) ordered Tokyo Electric Power Co., Inc. (TEPCO) to submit a report on the implementation status of the emergency response measures at Fukushima Dai-ni Nuclear Power Station (NPS), pursuant to the provisions of Article 31 of the Act on Special Measures Concerning Nuclear Emergency Preparedness.

- As for Fukushima Dai-ni NPS, TEPCO, emergency response measures such as emergency measures for the NPS have been taken since the declaration of nuclear emergency situation was issued pursuant to the provisions of Article 15, paragraph 2 of the Act on Special Measures Concerning Nuclear Emergency Preparedness on March 12.

- At the NPS, emergency measures such as recovery of power supply function and cooling function have been implemented, and all the units were brought to cold shutdown state on March 15. On account of the emergency response measures subsequently implemented, recovery of equipment and implementation of countermeasures for tsunami of the same scale as the one generated in the Great East Japan Earthquake have been largely achieved.

- In light of these circumstances, NISA decided to direct TEPCO to collect the report pursuant to the provisions of Article 31 of the Act on Special Measures Concerning Nuclear Emergency Preparedness, as set forth in the Appendix, in order to strictly verify and evaluate the implementation status of the emergency response measures taken by TEPCO.
