Ministry of Economy, Trade and Industry

01.10.2012 NA No. 3
January 11, 2012

Tokyo Electric Power Co., Inc.
President Toshio Nishizawa

Nuclear and Industrial Safety Agency
Hiroyuki Fukano
NISA-135d-12-2
NISA-161d-12-1

Regarding Appropriate Future Management of Fukushima Dai-ni Nuclear Power Station, Tokyo Electric Power Co., Inc. (Direction)

The Prime Minister requested the opinions to the chairman of the Nuclear Safety Committee (NSC) in the document No.1293 dated December 22, 2011, pursuant to Article 15, paragraph 4 of the Act on Special Measures Concerning Nuclear Emergency Preparedness (No.156, 1999). The Chairman of NSC submitted their opinions with the following required items to conform, to the Prime Minister, stating that cancelation of the nuclear emergency situation of Fukushima Dai-ni Nuclear Power Station (NPS), Tokyo Electric Power Co., Inc., could be declared in the document of No.66 dated December 26.

The Nuclear Industrial Safety Agency (NISA) also considers that it is important for your company to pay appropriate attention to the following required items and to take all possible measures for appropriate management of Fukushima Dai-ni NPS.

NISA requests your company to pay appropriate attention to the following required items when preparing the recovery plan of Fukushima Dai-ni, based on the nuclear operator emergency action plan for Fukushima Dai-ni NPS based on Article 7, paragraph 1 of the Act on Special Measures Concerning Nuclear Emergency Preparedness, which will be submitted to Ministry of Economy, Trade, and Industry.

NISA also requests your company to pay appropriate attention to the following required items when implementing the measures for restoration from nuclear emergency based on Article 27, paragraph 2 of the Act on Special Measures Concerning Nuclear Emergency Preparedness, and
implementing the necessary safety measures based on Article 35, paragraph 1 of Act on the Regulation of Nuclear Source Materials, Nuclear Fuel Materials and Reactors (No.166, 1957).

Required Items

1. To keep appropriate maintenance and management of the facilities in Fukushima Dai-ni NPS, since part of them are temporary facilities. To systematically lessen the degree of dependence on these temporary facilities.
2. To keep appropriate maintenance and management depending on situations during the recovery process of safety equipment such as the residual heat removal system. To make utmost efforts to take further safety measures against natural disasters.
3. To keep the complete safety management including the safety of the workers.
4. To review the influence on the facilities, considering that there were the records of unusual pressure/temperature gaps before cold shutdown.
